

# Faggot Building

Start with a rope about 230cm long and put a knot about 20cm from centre in each 'arm', then put an overhand loop in each end to make overall length about 140cm. Cut pink to about 200cm for tying. or about 350cm to go round twice.

Peg out 4 posts 40 cm apart and 60cm length apart. Put down a stake at each outside end and put some pink down on inside of posts holding the ends down and tidy, by tucking under the stake. Stack the brush neatly with overhang at each end to an overall length of about 1 metre after trimming until as high as wide when trodden down. Need 2 people for this stage. Use the laid stake to lift one end and thread a rope underneath. Push a substantial stake through each end loop and lift the loops up and over to the other side with the long arm doing the lifting, Once across slide the loop lower down the stake for maximum leverage with the short ends under the bundle and push down hard. When well and truly tight pick up the pink tie ends and bind the bundle. Repeat at the other end. Then start another one

Makes a slip knot for tying
